## EHA-SWG Scientific Webinar

**“The interaction of von Willebrand factor with platelet glycoprotein Ib: pathological implications and clinical manifestations”**

### About the meeting

The EHA Specialized Working Group (SWG) on Granulocytes & Constitutional Marrow Failures Disorders and the EHA-SWG on Bleeding and Thrombosis would like to invite you to the new free webinar: **“The interaction of von Willebrand factor with platelet glycoprotein Ib: pathological implications and clinical manifestations”**.

Join us on Zoom to learn about the importance of von Willebrand factor (VWF) in various mechanisms focused on GPIIb/IIIa such as platelet formation from megakaryocytes, and managing disorders related to loss- and gain-of-function variants of *GP1BA* or VWF.

**Date: October 11, 2023 at 15:00 CEST**

**Format: Virtual**

### Program topics:

- The physiological functions of VWF Genomics in MPN, MDS, AML
- Bleeding disorders due to loss- or gain-of-function variants of platelet GPIIb/IIIa
- Type 2 B von Willebrand disease

Free registration is open:
